

Pip item 2A.1 Enhance concurrent planning practice

2A.1.4: Clarify the mechanism for tracking concurrent planning in SACWIS (TWIST).

In preparation for this item during the first quarter of the PIP, our agency received TA regarding revising the concurrent planning process. During quarters 2, 3 and 4, the Permanency Planning work group revised the SOP and practice around working cases concurrently. During the 5th, 6th and 7th quarters the agency provided training to our field staff and foster parents. This item is the final step in the new concurrent planning process, and it centers on case documentation in TWIST.

SOP1.7

If a case is determined to be a concurrent planning case, the worker adds a concurrent planning permanency objective to the CYA plan. Next, they answer the questions related to concurrent planning.

Prior to CFC involvement, was the child placed in OOHC in another state		No	Enter Exit Screen	
If yes, Where?			When?	
Date Child/Youth will have been in OOHC 15 of most recent 22 months			07-08-2010
